National Summit on Quality in Education 23 - 24 October 2009: Chennai Trade Centre, Chennai

'Quality Education : Scalable with Inclusiveness'

Just like leaders in business and industry, educators across the nation are trying to meet the fast-changing needs and expectations of the student community. In order to develop capable, 'thinking youth' –the future force of the nation, the role of educators is now gaining immense credence. Improving access and Quality at all levels of education is now the priority area not only with the central and state Governments but also the onus now lies with private institutions as well. Gandhiji once said 'True education must correspond to the surrounding circumstances or it is not a healthy growth'. While government has chalked out plans to scale up education programmes across the nation with many initiatives like SSA, RMSA, National Knowledge Commission, the introduction of Right to Education Bill etc, a few of the private institutions are actively pitching in also to reach out to those who are away from the mainstream. This has coerced CII Institute of Quality (CII-IQ) to look at bringing about a new perspective to enhance the Quality of education across the nation since last decade. It is time that Education sector moves into the expansion mode and is equally scaled up to be more inclusive so as to reach out to a larger chunk of the Indian population and achieve atleast functional literacy in the next few years. The institute recognizes the fact that educational institutions must foster the type of learning, which can initiate change, encourage diversity and build a foundation for continuous improvement. This aspect will not only help the nation sustain the GDP growth closer to double digit but also realize the dream of becoming the next super power.

As a key beneficiary of the education services CII has embarked on many initiatives to bring about 'Quality in Education in India'. The Confederation of Indian Industry (CII) works to create and sustain an environment conducive to the growth of Indian industry; partnering industry, academia and Government alike through advisory and consultative process. It aims to enhance the competitiveness of all the key sectors of the economy, which impacts the growth of the country.

One such concerted effort is from CII's Institute of Quality, Bangalore which has been advocating the delivery of Quality Education in the nation for over a decade. In pursuance of this goal CII IQ, hosting its twelfth edition of the **National Summit on Quality in Education** at Chennai with the theme **'Quality Education : Scalable with Inclusiveness'**.

Summit programme includes sessions on:
